## SUMMARY

I am a web-based and mobile application software Engineer that provides professional support and maintenance through custom-made solutions. I am focused on tailor-made software solutions, instead of hyper-production. With expertise in leading technology stacks and contemporary programming languages, I offer solutions that align with current trends and requirements.

As a seasoned Software Developer specializing in Unity Development UX/UI Design, Front-end, Back-end, AI and Trading development, I bring a wealth of experience in architecting robust and innovative solutions. My proficiency lies in leveraging cutting-edge technologies to create dynamic and responsive applications.

Here's a glimpse of my expertise:

**Unity Development:** Developed a multiplayer PC and mobile game with integrated chat functionality, providing a seamless and engaging user experience.

**Trading Integration:** Proven track record in seamlessly integrating trading functionalities, providing users with advanced charting, real-time market data, and a seamless trading experience.

**AI Integration:** Expertise in incorporating artificial intelligence into applications, enhancing functionality through machine learning models and intelligent algorithms. This enables the delivery of advanced features, predictive analytics, and personalized user experiences.

**Stylish Figma Designs:** Designed simple yet stylish interfaces that received positive customer feedback, ensuring a balance between form and function.

**Interactive WebGL Experience:** Created a 3D WebGL experience that brought users into a dynamic and interactive environment.

My Expertise Area:

- 1.Trading Integration with TradingView
- 2.Unity3D & 2D Development
- 3.WebRTC Integration
- 4.UI/UX Development
- 5.AI Integration
